Graduate Engineer from the University of Cincinnati and ENSEM Nancy

About Me

Language	French (native) • English (fluent) • Spanish (intermediate)
Programming	Python • SQL • C/C++/Java/C# • MATLAB • Bash • JUnit • Agile-Scrum • Git
Web/Media	HTML/CSS • Flask • Postman • REST Endpoint • JavaScript • React.js • PHP • RESTful API • AWS • Photoshop
Hobbies/Associations	Soccer • Snowboarding • Climbing • Sailing • Guitar • Chess • Member of "Bureau des Arts" at ENSEM Nancy
Soft skills	Communications • Analytical skills • Teamwork • Organized • Adaptable • Leadership • Problem Solving

Experience

Stilog

Software Engineer

France

02/2024 - present

- Development for Safran of aerodynamic modelling software to model aerothermal phenomena for the design of turbomachinery

Alten

Embedded Software Engineer

Toulouse, France

07/2023 - 02/2024

- Development in C for Airbus of an AI on STM32 to perform predictive maintenance on a drill

INSOLEM

Intern Embedded Software Engineer

Strasbourg

01/2023 - 07/2023

- Development of a software for high voltage arresters in Octave, python (test and validation) and C (implementation on MCU).
- Development of software, drivers (C) and tests (python) of a solar tracker

ENSEM Conseil

Full-Stack Developer

Remote

05/2022 - 07/2023

- Development of a SaaS website, linked the website to an application only available to the paid subscribers

Projects

ACL

Video Game - Scrum Master

Nancy, France

01/2022 - 07/2022

- Developed a java video game using a Scrum development (regular sprints with UML Diagrams, backlogs, and reviews)

Twizzy

Recognize road signs from a video stream

Nancy, France

01/2022 - 06/2022

- Development of algorithms using the OpenCV Java library, MySQL connector Driver, and Google Tesseract to recognize road signs

Smart Bike Shelter, three Continents, One Project

Bike Shelter linked to a website - CS responsible

Nancy, France

08/2020 - 06/2021

- Collaborated with an American and Chinese team remotely with weekly meetings for one year
- Development of a website with APIs, in particular to obtain the number of available places from the Shelter's Raspberry Pi
- Designed and prototyped the 16 locks/ID readers of the shelter with Arduinos wirelessly connected by Xbees to one Raspberry Pi

Education

University of Cincinnati - Cumulative GPA 3.8

Master of Engineering - Computer Science

Cincinnati, OH

08/2022 - graduated in 08/2023

- Intelligent Systems • Software Test and QA • Data Security and Privacy • Intelligent Data Analysis • Innovation and Design Thinking

ENSEM - French National Engineering School

Bachelor and Master of Engineering - Computer Science

Nancy, France

09/2020 - graduated in 08/2023

- Software Analysis and Design • Computer Systems and Networks • Deep Learning • Complexity • Automatic • Statistics • Mathematic
